About TESPOK

Technology Service Providers of Kenya (TESPOK) is a professional, non for profit organization representing the interests of technology service providers in Kenya since 1999. We support our members through:

- **PEERING |**
- **POLICY & REGULATION |**
- **RESEARCH |**
- **TRAINING |**
- **NETWORKING**

Vision

ENABLER OF ICT GROWTH AND DEVELOPMENT

Mission

THE LEADING ASSOCIATION OF CHOICE IN PEERING SERVICES & STEERING ICT DEVELOPMENT

What is an Internet Exchange Point?

AN INTERNET EXCHANGE POINT (IXP) IS A PHYSICAL LOCATION THAT GIVES INTERNET INFRASTRUCTURE COMPANIES SUCH AS INTERNET SERVICE PROVIDERS (ISPS) AND CONTENT DELIVERY NETWORKS (CDNS) A PLATFORM TO CONNECT WITH EACH OTHER AND KEEP INTERNET TRAFFIC LOCAL.

How Peering Works

An Internet exchange point provides a single location for all the hardware necessary to connect multiple networks. Each network that is willing to enter into peering agreements at these locations usually has operational and technical requirements that you must meet before being able to connect to them.

THE INTERNET PEERING VLAN IS AN ETHERNET BASED UNICAST SERVICE, ENABLED TO SUPPORT BOTH IPV4 AND IPV6 NATIVELY.

THE SERVICE OFFERS INTERFACE SPEEDS OF 1, 10 OR 100 GIGABITS PER SECOND (1GE, 10GE, 100GE)

THE PEERING ACROSS KIXP IS VIA BORDER GATEWAY PROTOCOL (BGP) AND IS MONITORED 24×7 BY OUR NOC.

Key Benefits of Peering

Cost Reduction

THE TRAFFIC THAT TRAVELS THROUGH THE IXP ISN’T USUALLY BILLED BY ANY OF THE PARTIES AS IT OPERATES ON MULTILATERAL PEERING.ALSO COST OF BANDWIDTH WILL REDUCE DUE TO OPTIMIZED USE OF IP TRANSIT TO UPSTREAM PROVIDERS.

Reduced Latency

THE DIRECT INTERCONNECTION WITHIN BORDERS ALSO PREVENTS DATA FROM HAVING TO TRAVEL FROM ONE CITY TO ANOTHER (OR EVEN OUTSIDE THE COUNTRY OR THE CONTINENT) IN ORDER TO GO FROM ONE NETWORK TO ANOTHER THUS, REDUCING LATENCY.

Strong Local Connectivity

KENYAN CONTENT PROVIDERS, CARRIERS AND BUSINESSES BENEFIT BY EXCHANGING TRAFFIC LOCALLY VERSUS TRANSITING TRAFFIC TO THEIR INDIVIDUAL ISP.

Joining KIXP

ASN Number & Prefix

As provided by AFRINIC or other governing body.

Application Form

Duly filled application form by authorized personnel.

Certificate of Incorporation

Members of TESPOK must be duly registered as a business in Kenya

KRA PIN Certificate

A valid Kenya Revenue Authority PIN certificate

TESPOK iCSIRT

Industry Computer Security and Incident Response Team (iCSIRT) for TESPOK

Detect & Report

INCIDENTS THAT POSE A THREAT TO THE SECURITY OF OUR MEMBERS

Investigate

ALL FORMS OF NETWORK ABUSE SUCH AS SPAM, PHISHING, HOST COMPROMISES, DENIAL-OF-SERVICE ATTACKS AND HOST VULNERABILITIES

Information security threats are not limited to particular networks or national boundaries, and we work with other CSIRTs across the world to manage and resolve incidents. We have built strong relationships with other security researchers and sources of security reports to ensure we provide you with a fast and effective response.
